

# Realeyes3D Corporate Fact Sheet

**THE COMPANY:** Realeyes3D was founded to expand and improve the user experience through innovative uses of the mobile camera phone. Realeyes3D creates phone features and services for easily and conveniently capturing all the handwritten and printed information in daily life with the same simple and natural gesture of taking a picture.

**THE SERVICE:** Qipit is an online service that exploits camera phones to transform photos of information – text and handwriting – into digital copies. Qipit turns handwritten notes, contracts, articles, price lists or whiteboarded information into crisp clean digital copies in seconds. Qipit users can email and fax their qipit documents in order to immediately share information with employees, business associates, family and friends. Also, qipit users can store their qipit documents on the qipit website or via email on their own PC for future use.

**OTHER** *Digitizer™* – create and send handwritten messages

**PRODUCTS:** *w-Postcard™* – create virtual postcards with handwritten messages

*w-Greetings™* – create virtual greeting cards with handwritten messages

*MotionLens™* – pan and zoom any image on a phone display with wrist motion

These products have been embedded in over 10 million camera phones by manufacturers including Samsung and Sanyo as of June 30, 2006.

**HISTORY:** Launched in 2002, Realeyes3D S.A. is privately held with headquarters in Paris and operations in the U.S. and Asia.

**TECHNOLOGY:** Realeyes3D has patented and patent pending technologies in the areas of ink extraction and motion detection.

**FINANCING:** Realeyes3D has raised \$13.5 Million in two rounds of funding from Atlas Ventures, Partech International, Greenpark Capital (formerly Siemens Acceleration in Communications) and T-Source.

**EXECUTIVE** Benoît Bergeret, CEO and Co-Founder

**MANAGEMENT:** Conrad Hametner, Mobile Services, North America

Philippe Dewost, Marketing and Business Development

Antoine Martin, Product Engineering
